## Module 1: Controlled Unclassified Information (CUI) Key Concepts

1.	Executive Order (EO) 13556 of November 4, 2010 “establishes an open and uniform program for managing information that requires safeguarding or dissemination controls.” This is referred to as the Controlled Unclassified Information (CUI) Program.
2.	There are over 22 categories & 82 subcategories of Controlled Unclassified Information (CUI), or sensitive information types.
3.	Each CUI category or subcategory is based on one or more authoritative enactments (laws, regulations, government-wide policies or judicial decisions).
4.	<p>Upon issuance of the Federal CUI Policy, the Federal CUI, the CUI Registry becomes the official repository of CUI Program information. The Registry is a compendium of sensitive information categories, subcategories and their respective enacted authorities.</p> <p>Note: The Federal CUI Policy is targeted to be issued in calendar year 2016.</p>
5.	<p>Upon issuance of the Federal CUI Policy, the DOI “Controlled Unclassified Information (CUI) Program Compliance Plan” will be Interior’s strategy for implementation of our sensitive information safeguarding and other handling practices. The plan addresses five program requirement areas: governance, policy, personnel training, systems reviews, and agency’s internal self-inspection.</p> <p>Note: The Federal CUI Policy is targeted to be issued in calendar year 2016.</p>
